TOBACCO
MULTITASKING

The machine

Innovative machine, multi-purpose, 3-wheel drive, equipped with various accessories.

Designed with particular attention to the use in different crops and in the different phases of the crop itself. This is a facilitating machine that simplifies the various operations, reducing human effort, timing, and increasing homogeneity of work, achieving a better yield on the product in terms of quality and quantity.

Technical features

- 50 cv Lombardini engine (25% slopes can be exceeded).
- Hydraulic transmission "Poclain".
- Speeds from 0 to 15 km / h.
- Anti-tipping cab with Roll bar to safeguard operator safety.
- Storage platform.
- Mechanical transplantation of vegetables, bulbs, grafts.
- Weeding.
- Bedding and soil preparation.
- Granular fertilizer spreads.
- Foliar treatments.
- Horticultural, fruit, leaf and bulb facilitator.
- Disrupted localized product dispensing from the computer.

Collection and storage of the product

Localized weeding

Optional accessories

Foliar treatment

On request there is a further version available for hilly terrain: • floor height 1,25m, • adjustable height-adjustable rear wheels with self-leveling system, • special accessories for harvesting on particular fruit plants and not (eg see bananas etc.)
